

VENTING

CATEGORY I, II, III, IV & INDUSTRIAL VENTING

Somers Environmental Venting

Somers Environmental Products is a manufacturer's representative serving the Ontario commercial, institutional and industrial HVAC market with a wide variety of products since 1993.

We carry numerous venting types ranging from B-type vent to industrial-vent and everything in between. Our list of BH / S636 venting materials includes stainless steel (AL294C), polypropylene, PVC, and CPVC. For industrial applications – such as steam boilers, diesel generator exhaust, etc. - we offer double-wall insulated or non-insulated stainless steel (304 or 316).

To help ensure that every venting job is successful, we offer the following support:

- **Inventory:** our vent stock includes the most common sizes of our AL294C product and can be shipped anywhere in Southern Ontario within one day. Non-stock items can often be quick-shipped in 7 business days.
- **Venting Sizing:** using our ASHRAE-based computer sizing program we can size your venting project quickly and accurately.
- **Engineered Systems:** complicated venting systems are our specialty. We can help you design the best, most cost-effective system for your situation.
- **Site Support and Submittals:** before an order is placed we'll help to verify on-site dimensions and provide an accurate submittal package.
